

DEVANG DHAKATE

Full-Stack Developer & Creative Technologist

Pune, India | +91 8208631447 | devangdhakate22@gmail.com | linkedin.com/in/devang-dhakate | github.com/Justdevang | devangdhakate.onrender.com

SUMMARY

Full-stack developer based in Pune, India, building end-to-end products: e-commerce platforms with real payments and logistics, interactive 3D web experiences, and native apps. Focused on the details that make a product work in production — security, performance, and the integrations most people skip. Currently balancing a full-time operations role with independent full-stack development, open to full-time and freelance opportunities.

SKILLS & STACK

- Frontend: React, Vite, Three.js, GSAP, Lenis, CSS
- Backend: Node.js, Express, MongoDB, Socket.IO
- Tools & Infra: Cloudflare Pages, Razorpay, Stripe, GitHub, Clerk Auth
- Design & 3D: Blender, Figma, Illustrator, After Effects, Motion Design
- Marketing: SEO, SEO/AEO/GEO Strategy, SEM, Lead Generation

EXPERIENCE

Full-Stack Developer & Creative Technologist — Morivaná Daily

Freelance

- Built a full MERN stack D2C e-commerce storefront end-to-end: Clerk passwordless auth, dual-gateway payments (Razorpay/Stripe), and automated Delhivery logistics fulfillment.
- Hardened the Express backend (Helmet, CSP, rate-limiting) and implemented Meta Pixel/CAPI for privacy-compliant ad attribution.
- Outcome: live in production, serving active customers across India and Canada with automated payment routing and logistics.

Full-Stack Developer — Soundabode

Freelance

- Built an immersive scroll-driven web experience (React, Three.js, GSAP ScrollTrigger) and migrated hosting to Cloudflare Pages.
- Executed a localized SEO/AEO/GEO strategy and lead-generation funnel to build local search authority for a music production academy.
- Outcome: live site actively powering the academy's marketing, driving local search leads and user engagement.

Customer Service Associate L2 — Amazon

Sep 2025 - Apr 2026

- Operate within a high-scale, process-driven enterprise environment, resolving critical escalations and managing queue workloads under strict SLAs.
- Coordinate cross-department workflows; role funds independent development work while sharpening operational habits — ownership under pressure, structured communication, and attention to detail.

Customer Service Representative — Lifestyle International Pvt. Ltd.

Oct 2023 - Oct 2024

- Contributed to a 30% overall profit increase by assisting in consistently exceeding monthly sales targets.
- Built and maintained long-term customer relationships to drive repeat sales, deliver customer-first brand experiences, and secure high positive feedback.

SELECTED PROJECTS

Morivaná Daily — D2C e-commerce wellness platform (Freelance)

- Built a full MERN stack storefront end-to-end: Clerk passwordless auth, dual-gateway payments (Razorpay/Stripe), and automated Delhivery logistics fulfillment.

- Hardened the Express backend (Helmet, CSP, rate-limiting) and implemented Meta Pixel/CAPI for privacy-compliant ad attribution.
- Outcome: live in production, serving active customers across India and Canada with automated payment routing and logistics.

Soundabode — *Three.js scrollytelling experience (Freelance)*

- Built an immersive scroll-driven web experience (React, Three.js, GSAP ScrollTrigger) and migrated hosting to Cloudflare Pages.
- Executed a localized SEO/AEO/GEO strategy and lead-generation funnel to build local search authority for a music production academy.
- Outcome: live site actively powering the academy's marketing, driving local search leads and user engagement.

Roadmaptic — *AI-powered learning roadmap generator*

- Built an AI product that parses a user's target role, current skills, and weekly time commitment to generate a custom 12-week learning roadmap (React, Vite, Node.js, OpenAI API).
- Curated a registry of high-quality free tutorials instead of raw search links; set up automated email delivery and an SEO-friendly blog/glossary directory.
- Outcome: active production deployment generating structured curricula without sign-up barriers.

Gyroscope-Controlled Fruit Ninja — *Real-time browser game*

- Built a browser game using Three.js and Socket.IO that streams a phone's gyroscope data (DeviceOrientation API) to a Node backend in real time, with no touch or keyboard input.
- Outcome: working cross-device real-time motion control proof-of-concept with under 20ms local streaming latency.

Desktop Pet (macOS) — *Native SwiftUI/AppKit application*

- Built a native macOS utility companion in SwiftUI and AppKit with a custom low-poly 3D character modeled and rigged in Blender, using borderless, transparent overlay windows so it walks on top of active system windows.

EDUCATION

B.Sc. Data Science & AI — Shatayu College, Nagpur	2025 – Current
Intermediate (CBSE) — School of Scholars, Nagpur	2021
